During a time of change and upheaval, the Decorative Collection 24+ offers you more possibilities and solutions: Inspiring new introductions, established decors, sustainable and healthy living products as well as a multitude of digital

services that optimally link all elements of the Collection together. No matter what project you design and implement, we provide you with everything from one source. This makes your work more flexible than ever before.

Decor overview

In our new decor introductions, we translate key trends for your benefit. Wood reproductions are reserved and versatile, stone replicas display more authenticity, metallic and textile decors generate accented highlights and uni colours become gentle collaborators that prop up the room. Explore the decor selection of the Decorative Collection 24+.

- ✓ More than 300 decor/texture combinations
- ✓ 201 Eurodekor decors in material match
- ✓ 68 new Eurodekor decor/texture combinations
- ✓ 32 Perfect Sense decor/texture combinations, 19 new introductions
- ✓ 11 New textures

Product Overview

You design and realise extraordinary projects in furniture and interior design. We have the right products for these projects - no matter the requirements: You choose from a diverse product range, further refined with trend-oriented decors and surfaces. All information regarding our available products is available here.

Matching decors and materials

Euro Melamine Faced Boards (207 × 280 cm)

Laminates (131 × 244 cm)

Edging

Edging

YOUR BENEFITS

- High quality in terms of look and feel
- Matching edging for all decors in the collection
- Can be supplied from one roll upwards
- Wide choice of thicknesses and widths

Create the look of solid furniture or an accented design by coordinating the decorative board and edging in terms of colour, texture and degree of gloss. The wide variety of matching and contrasting edging in the EGGER Decorative Collection offers creative solutions for all design projects.

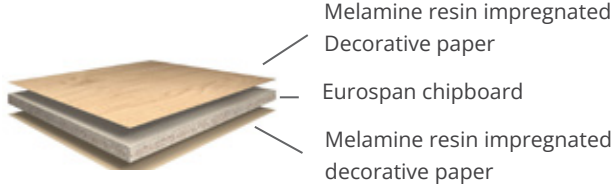

Eurodekor ®Faced Chipboard

YOUR BENEFITS

- Universally applicable
- Resistant to abrasion and scratches
- Lightfast
- Recyclable
- Ready for immediate use – no oiling, staining or other protective measures required
- Authentic-looking decors and surfaces
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)

Product structure

– 13.8 kg CO₂ / m²

87% materials from renewable resources
13% materials from fossil resources

23% recycled material
42% by-products from the sawing industry and pre-consumer recycled wood
35% fresh resources

68% regional wood origin

100% verified legal wood origin
61% of which certified

Eurodekor melamine faced chipboards (in accordance with EN 14322) consist of raw chipboard that is covered on both sides with decorative paper.

They are suitable for horizontal or vertical applications in furniture and interior design, such as fronts, shelves, wardrobes or wall cladding.

We offer a contemporary, aesthetically sophisticated solution in proven EGGER quality as part of the decor and material combination. Depending on the application and stress, choose the right coreboard for your project.

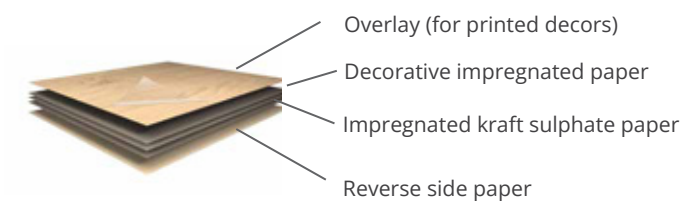

Laminates

YOUR BENEFITS

- Resistant to abrasion, impact and scratches
- Hygienic and food-safe
- Wood reproductions offer a cost-effective alternative to solid wood and veneer
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial surface properties in accordance with ISO 22196 (= JIS Z 2801)

Product structure

2.03 kg CO₂ / m²

60% materials from renewable resources
40% materials from fossil resources

100% fresh resources

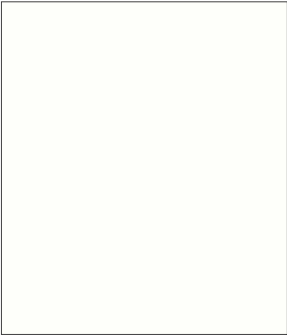

The multi-layered construction of laminates and the materials used to this end ensure high levels of usability. Thanks to their postforming property, almost all laminates can be postformed. MED-certified. laminates are available for use in shipbuilding.

Applications

- Fronts
- Visible sides
- Sliding door elements
- Office tables
- Sideboard

Advantages

- Reduces cleaning effort thanks to anti-fingerprint property
- Horizontal application possibilities (except kitchen worktops)
- Optimised size
- Bacteria and germs are reduced by 99.9% within 24 hours
- Decor and texture combination with PerfectSense Premium lacquered boards, PerfectSense Premium laminates and PerfectSense ABS edging
- Additional decor-texture combinations are available upon request from 24 pieces

Characteristics

- Super-matt, velvety-warm lacquer surface
- Anti-fingerprint property
- High scratch and micro-scratch resistance
- Stain-resistant
- Resistant to many cleaning agents
- Resistant to dry and moist heat
- Antibacterial surface property according to ISO 22196 (= JIS Z 2801)
- Meets the formaldehyde classes/standard requirements of the E1E05 regulation in Germany and the TSCA (CARB2) regulation in the USA
- Certified according to TÜV-PROFiCERT-product Interior PREMIUM

W1000 PM**PREMIUM WHITE****► Colour and character**

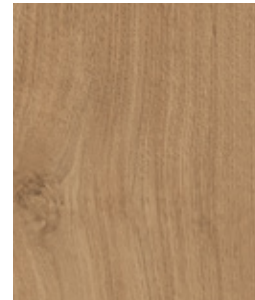

The W1000 Premium White is opaque and therefore looks very high-quality. Its neutrality creates a harmonious contrast to natural wood. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The anti-fingerprint property perfects the look and feel of this matt uni surface.

Architect: McAleer & Rushe, Cookstown, (IR)

Location: London, UK

EGGER decors and accessories have been used to transform the old office block into contemporary accommodation.

With fantastic views of the London Skyline, the Marlin offers a hotel look and feel. Designed by McAleer & Rushe and fabricated by Woodland, the Marlin features EGGER products throughout the aparthotel. H3325 ST28 Tobacco Gladstone Oak, with matching 2mm edge, features across the interior and exterior of the wardrobe, bedside tables, headboard, desk, TV unit and kitchen partition walls. Wardrobes

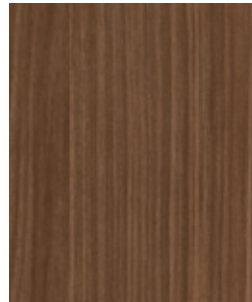

in the Deluxe Red Rooms and all of the kitchens feature PerfectSense Matt in W1000 PM Premium White. Woodgrain H3704 ST9 Tobacco Aida Walnut has been used for across all 236 apartment doors and fire doors. David Brennan, Project Co-ordinator for Marlin Waterloo, said "We are delighted with the finish provided by EGGER. The decors complements our interior and their durability is well suited to the hospitality sector. We really liked EGGER's wide range of finishes as it allowed us to be flexible when designing our cosmopolitan aparthotel."

U705 PM**ANGORA GREY****► Colour and character**

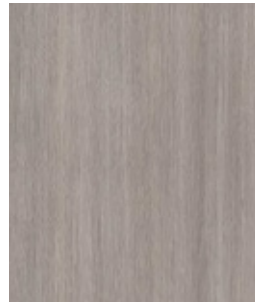

The U705 Angora Grey belongs to the very bright grey tones, but stands out with its red character. This colour tone is modular and flexible in all combinations. It looks particularly harmonious together with medium grey and also reddish woodgrains. It is the new alternative to white for making material combinations fluid, warming and adaptable. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The anti-fingerprint property perfects the look and feel of this matt uni surface.

U702 PM
CASHMERE GREY

► Colour and character

The U702 Cashmere Grey is an all-rounder that can bring warmth yet also absolute neutrality to all uses. The slightly reddish grey nuance creates timeless and harmonious combinations with equally reddish wood tones. Gradations to other warm grey or white tones have a simultaneously minimalist and cosy effect. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The availability of these colour tones in a wide variety of surfaces makes it possible to match combinations with exciting textural contrasts.

Executed by:

Architect: Gänse Architekten PartmbB, Kulmbach (DE)

Location: Deutschland

After the renovation, this private house shines with a bright, cosy atmosphere. Above all, the numerous storage space options in modern designs make the living space not only visually but also practically eye-catching.

The 220 m2 former rafter's house was renovated and extended from the ground up. In the preparation kitchen, the focus was on creating storage space, where the visual aspect was not neglected, while still maintaining functionality.

Thanks to the warm colour tone of U727 ST9 Stone Grey, the preparation kitchen and the adjacent coat rack appear both modern yet cosy. The entire door unit impresses with the matt PerfectSense Topmatt surface of U702 PM Cashmere Grey with anti-fingerprint property. There is also plenty of storage space in the children's room without it looking too cluttered. The entire interior design impresses with harmonious transitions between different materials and practical storage space.

U767 PM
CUBANIT GREY

► **Colour and character**

The U767 Cubanite Grey is a medium taupe nuance simultaneously characterised by warmth and neutrality. In combination with woodgrains with grey content, it creates a harmonious combination, but also provides a good basis for working with warm grey colour gradations or even unusually intense accents. The PM PerfectSense Premium Matt lacquer surface lends uni colours a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The anti-fingerprint property perfects the look and feel of this matt uni surface.

U708 PM

LIGHT GREY

► Colour and character

The neutral U708 Light Grey can be combined in many different ways. Tone-on-tone combinations with other grey tones are possible and it can be used as a contrast with natural woodgrains. In interior design, this grey decor is an all-rounder for neutral surfaces. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The anti-fingerprint property perfects the look and feel of this matt uni surface.

Architect: Konturgut, Wörgl (AT)

Location: Schwoich (AT)

Velvety-warm surfaces made of PerfectSense Matt create a pleasant work atmosphere. The design agency Konturgut designed the interior of the new office and production building for Vahle Automation GmbH in Schwoich (AT). The goal was to create a feel-good oasis for employees. The technology and quality of the products are reflected in the design, which was realised by

Tischlerei Bichler. What product is more suitable for a “feel-good surface” than EGGER’s PerfectSense lacquered boards? They were used in the discreet uni colours U708 PM Light Grey and U732 PM Dust Grey for the office furniture, counters and furniture in the cafeteria and the counters in the reception area.

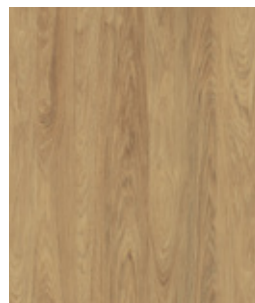

U665 PM

STONE GREEN

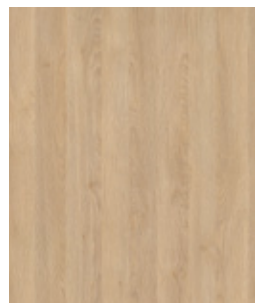

► Colour and character

Green is nature and therefore represents sustainability more than any other colour. In 'Biophilic Design', rooms are often designed with gradations of many muted green tones, which reflect the diversity of nature when combined with natural materials. The U665 Stone Green has the most grey of all the muted green tones. It therefore appears cooler, more technical and more reserved, so that entire furniture elements or larger surfaces can also be designed with it. Combinations with light wood look natural; this green looks very modern alongside natural white or black. This colour tone looks particularly elegant in combination with the PM PerfectSense

DUST GREY

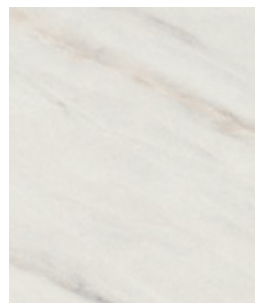

► Colour and character

The U732 Dust Grey is a medium, cool grey. Its neutrality allows many combinations and can be used in offices and many different applications. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material or laminate as the base material. The anti-fingerprint property perfects the look and feel of this matt uni surface. The availability of these colour tones in a wide variety of surfaces makes it possible to match combinations with exciting textural contrasts.

W1000 PM

Executed by:

Architect: Vivamo GmbH

Location: Deutschland

The German company ABUS focusses on the mobile security of the future and is showcasing this in the expanded ABUS Security World.

The German company ABUS focusses on mobile security as part of the 'bicycle boom' and is expanding its company campus, the ABUS Security World. With over 1000 m², ABUS Security World is the centrepiece with a showroom, a company museum, a restaurant and an asphalt course/test track. Visitors enter the cycling world of experience through an illuminated tunnel, which contains life-size images of the famous Paris-Roubaix race and original cobblestones from the route, teasing the circular experience. When designing the 400 m² extension to ABUS Security World, the focus was on high-quality design and a unique brand experience. The H1180 ST37 Natural Halifax Oak decor was used for furniture and back buffets in the restaurant, bar

and seating areas. (It emphasises the wide range of possible applications for the H1180 ST37 Natural Halifax Oak decor). The natural accent of the H1180 ST37 Natural Halifax Oak decor with Feelwood Rift synchronised pore surface looks elegant, whilst also looking relaxed and casual. Historic bicycles and pictures from the ABUS archive adds a distinct rustic touch to the catering corner that contrasts with the modern design in the exhibition areas. This creates a relaxed feeling of well-being among visitors, emphasised by the visual appearance. The OEM panels of the bicycle frames and all slatted walls are made with U732 PM Dust Grey. Acoustic wall panels in U960 ST9 Onyx Grey were also used for the stage. The indirect lighting rounds off the concept and supports the pleasant atmosphere. Thanks to this harmonious overall picture, the uniqueness is found not only in the service and the product, but also in the store itself.

U999 PM

BLACK

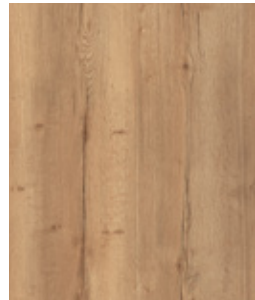

► Colour and character

The uni colour tone U999 Black remains an important contrast in furniture and interior design. In the contract sector, the striking black and white contrast is even more frequent. In furniture design, black is increasingly being used more subtly with natural white tones and sand colours, with 'muted colours' and also with naturally elegant wood variants. For this purpose, Black is shown here with a variety of strong character textures that no longer make the colour appear so black. The PM PerfectSense Premium Matt lacquer surface lends the uni colour a special matt quality and a unique surface calm through the use of an MDF core material as the base material.

Executed by:**Architect:** Todor Petkov , Häfele Austria GmbH**Location:** FRITZ EGGER GmbH & Co. OG Holzwerkstoffe , Häfele Austria GmbH

Micro Living and Circular Living are strong trends that are redefining how we live. In cooperation with Häfele, the Nagold (DE) specialist for intelligent furniture and construction hardware, lighting and electronic locking systems, EGGER has brought these trends to life under the name “The Moving Tree” in the form of an oversized tree trunk that can be walked on and lived in. The concept demonstrates the possibilities of flexible, comfortable living in the smallest of spaces.

Inspired by the forest as the place of origin of EGGER products, a tree trunk forms the centrepiece of this special exhibition space in the newly renovated EGGER Forum in St. Johann in Tirol (AT). The round shape and unusual proportions of the tree trunk presented a challenge, but this was overcome with

modern surfaces and multifunctional furniture modules. It enables a seamless transition between the entrance and bathroom, living, sleeping and working areas as well as the kitchen. The EGGER DecoWall forms the outer shell. This special print of a tree bark was printed directly onto the sanded OSB board using digital printing. It enhances the wood-based material. A combination of U604 ST9 Reed Green and U999 PM Black was chosen for the kitchen fronts. The colour green is subconsciously associated with nature and therefore stands for sustainability like no other colour. The uni colour black provides an important contrast. The F800 ST9 Crystal Marble decor was used for the back wall of the kitchen. With its veins full of character in warm grey, which create harmonious transitions, this marble has a very natural effect.

ALPINE WHITE

► Colour and character

The W1100 Alpine White is the most neutral white of the EGGER Decorative Collection. It matches with the popular RAL Signal White, which is frequently used in interior design. Its high opacity is further enhanced with the amazing depth of the PG PerfectSense Premium Gloss high-gloss lacquer finish. The availability of this white tone in a wide variety of surfaces makes it possible to match combinations with exciting textural contrasts.

Location: Poland

In an opticians in Poland, vision is also important when it comes to interior design.

When designing the commercial surface of the opticians Rosiewicz Optyka in Bielsko-Biala in Poland, the focus was on high-quality design. EGGER's PerfectSense Gloss lacquered boards in U999 PG Black and W1000 PG Premium White create a sophisticated, high-gloss effect, while the decor Natural Halifax Oak with its synchronised

pore surface provides a natural accent. The bright white of the shelves and furniture stands out thanks to the interplay of different materials: wood, marble and tiles. The high reflective properties of PerfectSense Gloss enhance the mirror effect of the glasses on display. Used with other decors, this board creates the perfect background on which to present the optician's products.
